## Algy 2 for hand-held ClassPad

### Some recommendations when getting started with ALGY 2, for ClassPad hand-held:

- Delete any old versions of Algy you may have installed (as these are beta versions) before installing Algy 2.
- Visit <http://www.stepsinlogic.com> download a “trial version” of Algy 2 – and save this to your PC.
- Now install this “trial” Algy 2, on your ClassPad hand-held. To do this, use the ClassPad Manager V3.0. **OR** if you have a ClassPad 330 use the FACP1 software found on the ClassPad330 utilities disk.
- Then (using the “Exchange Window” option on your **ClassPad Manager V3.0** accessed by right-clicking on the ClassPad 300 emulator) - choose the “Handheld Assist” option and then “Install Add-in to ClassPads”. The Handheld assistant will guide you through transferring the Algy 2 to each ClassPad, in turn.

note: **If your ClassPad is still running operating system 2.2 or older, it is advised to update your handheld & ClassPad Manager to OS3.0. This update is not found on the internet – please contact Casio Education on (02) 9415 5062 or (02) 9415 5052 or by email: [casio.edusupport@shriro.com.au](mailto:casio.edusupport@shriro.com.au) for information on how to access this update.**)

- Next ‘unlock’ the trial version of Algy 2. To do this you need to register using your serial number (inserted in the box with ClassPad hand-held units.) on the Stepsinlogic website. *Stepsinlogic* will then send you a unique **registration code** by e-mail.
- **NOW** on each ClassPad handheld, open the Algy 2 program and tap “File” then “Register” ...now enter your **registration code** details (exactly) on each individual ClassPad, to ‘unlock’ the full version of Algy 2.
- YOU ARE DONE !!!
- **We recommend you keep a copy of these registration details in a safe place, for future reference !**

note: **Algy 2 also comes in a ‘computer’ version – for Classroom presentations – visit <http://www.stepsinlogic.com> for details.**
