Lesson 1
Introduction to the ClassPad Manager Software

Welcome
During this course, you will learn many great features of the ClassPad Manager software and gain the skills needed to use the ClassPad in every future mathematics course you take. Each lesson is designed to introduce you to a new feature of the ClassPad and at the same time review features from previous lessons. Each lesson will also involve math, the fun part. We have tried to introduce many areas of mathematics within the lessons, and hope that they will encourage you to explore mathematics more. But remember, your main goal is to master the new feature in each lesson and enjoy the mathematics along the way.

Lesson Goals
• To become acquainted with your ClassPad Manager Software
• To master drag and drop
• To learn how to graph an equation

In Lesson 1, you will learn how to:
• Turn the ClassPad Manager on and off
• Open an application from the Menu
• Input and edit data
• Drag and drop
• Draw a graph

Upon completion of this lesson, you will be able to answer the following questions:

1. What is the main menu used for?
2. How do you clear a window?
3. How do we select an expression?
4. How do you drag and drop an expression or equation?
5. What does “ans” do?
6. What is an emulator?

Time required
About 60 minutes.
Getting Started
The easiest way to learn how to use the ClassPad Manager (your virtual calculator), or any software is to practice! As you work through the steps below, please try each part a few times. If you make a mistake, great, you are trying. The ClassPad Manager is software, just like other applications. The more you explore, the more you will learn.

PART I
And now, it is time to become acquainted with the ClassPad Manager...

The ClassPad Manager is a type of **emulator** for the handheld ClassPad 300. In this instance, an **emulator** is software that lets us run programs written for a handheld on a computer. Emulators for handhelds are sometimes called **virtual calculators**.

1. Double click... (a shortcut on your desktop). You should see:

   To enlarge the ClassPad, **right click** anywhere on it and select **Zoom 2x** or **LCD**.

   Click **Menu** at any time to return to the main menu. This is sometimes called the **launcher menu**.

   **Scroll** to see other applications.

   **Click ON/OFF** to close the ClassPad Manager.

   **Clicking EXE** is the same as pressing **Enter** on your computer keyboard.
2. Opening an Application

a. Click on Menu
b. Scroll up, if needed
c. Click on Main to open the Main application
Your Main window may not be empty, but it is ok!
d. Click the small box (you will see the cursor blink)
e. Type in 123+4 and press EXE or Enter

3. Clearing an Application

a. Click on Edit to open Edit menu
b. Select Clear All
c. Click OK
Your Main math window should now be empty.

4. Inputting/Editing Data

*You can use your keyboard or the ClassPad keypad to input data.

a. Type in 2+34 and press EXE or Enter
b. Click between 3 and 4 (You will see the cursor)
c. Press EXE or type a . to change 34 to 3.4
d. Press EXE or Enter

Where are you? Watch for the cursor blinking to find the answer!
5. Drag and Drop

a. Click following \(2+3.4\)

b. **Drag** to the left to select it

c. **Release the mouse**

d. **Next, press on selection** (do not let go) and **drag** to next line

e. Press \(\rightarrow\) twice (or press the back arrow on your keyboard)

f. Press \(\text{EXE}\) or Enter

g. Repeat a-f a few times.

---

**PART I**

**Practice Exercises**

Before beginning the practice exercises, open a word document, type in the following information and then *save it as Lesson1 in your CASIO folder within My Documents*:

- Date: (enter today's date)
- To: (put your instructor's name here)
- From: (put your name here)
- Re: Lesson 1

1. Clear your Main window.
2. Evaluate 125+234.
3. Change 125+234 to 825+534 and evaluate again.
4. Drag your answer to the next line and divide by 9. Evaluate.
5. Get a screen capture and paste it into your Lesson1 document (under a title of PART I).

   **[Hint: To get a screen capture, right click on the ClassPad Manager and select Capture Screen. OR, just press the F8 key.]**

6. On the next line, type in 10+ans and press EXE or Enter.
7. Next, just type in +10. Notice ans is automatically placed in front of the + sign for you. Press EXE or Enter.

8. Get a screen capture. Please add two blank spaces following the first screen capture and then paste this one.

9. What is ans? Make a note to yourself so that you can answer this in the near future.

10. Clear your Main window again.
11. Type in seq(x,x,1,10) and press EXE.
12. Drag and drop seq(x,x,1,10) to the next line and change it to seq(1/x,x,1,5). Press EXE.
13. Type in *5 (you will see ans*5) and press EXE.
14. Type in sortA(ans) and press EXE.
15. Get a screen capture. Add two blank spaces following the second screen capture and then paste this one.

Note: Drag and drop is easy ONCE you have succeeded a few times. Please let me know right away if you are having trouble with this. We can work on it together.

Important: Before beginning part II, we should make sure our ClassPad settings are the same. Does your status bar look the same as the one in the picture below?

Setting the Result Type

1. Click on and then
2. Really easy ☺ Click on a name in the status bar to change it
3. Another way: Select ▼ and then Basic Format
4. Make sure your Basic Format settings are the same as the ones shown
5. Select Set
6. Notice that some of your Basic Format settings show in the status bar

Just click a mode name to change!
PART II
In this part you will explore graphs in 2-Dimensional space.

1. Graphing in 2-Dimension
   a. Click and then (Graph&Tab...) (Graph&tab...)
   b. Click in the box following y1
   c. Type in \( x^2-1 \)
   d. Press or Enter
      *Notice that the box preceding y1 became checked.
   e. Click on the toolbar

2. Line Style
   a. Click on the line inside the [ ]’s to the right of y1
      *A dialog should open.
   b. Select a different line style by clicking on it (your choice)
   c. Click OK
   d. Graph y1 again
      *Clicking will graph all checked equations.

3. Inequalities
   a. Click on the = sign directly following y1
      *A dialog should open.
   b. Select an inequality type by clicking it (your choice again)
   c. Graph y1 again
   d. Change your line style again
   e. Graph y1 again (notice the shading changed)
PART II
Practice Exercises

1. Open the 2-D Graph application and clear its equations.

2. Graph $y_1 = \sin(x)$.

3. Change the line style of $y_1$ and graph it again.

4. Drag and drop the $\sin(x)$ to the small box following $y_2$. Change $y_2$ to $2\sin(x)$, press Enter and click the graph button. Think about how the graphs differ.

5. Change the line style of $y_1$ and $y_2$ so that they are different. Graph $y_1$ and $y_2$ again to see the line change.

6. Add the title PART II to your Lesson1 document just below the three screen captures.

7. Get a screen capture and paste it into your Lesson1 document (under the PART II title).

8. Uncheck $y_1$ by clicking on its check mark. Click the button for graphing. Notice only $y_2$ is graphed.

9. Uncheck $y_2$ and then input and graph just $y_3 < 2x - 1$.

10. Get a screen capture. Add two blank spaces following the last screen capture and then paste this one.

11. Uncheck $y_3$.

12. Input and graph $y_4 = x^2 - 4$. Be sure to check the box.

13. While the Graph window has focus, open the Zoom menu and select Quick Standard.

14. Open the Analysis menu and select Trace. Move the cross-hair cursor around by pressing the left and right arrows on your keyboard.

15. Get a screen capture. Add two blank spaces following the last screen capture and then paste this one.

16. Spend a few minutes graphing. You can edit $y_1$, $y_2$ and $y_3$, or enter different equations. Also, look in the Analysis menu (this is a very useful menu). Have fun!
PART III
In this part, you will explore graphs in 3-Dimensional space.

1. Graphing in 3-Dimension

   a. Click to return to the main menu and then click on
   b. Clear the window, if needed (Edit/Clear All)
   c. Click in the box following \( z_1 \)
   d. Type in \( \frac{1}{x^2+y^2} \)
   e. Press or Enter
   f. Click on the toolbar
   g. Press the + key to zoom in
   h. Press the – key to zoom out
   i. Press the = sign a few times

2. Another Graph

   a. Click in the box following \( z_2 \)
   b. Type in \( \frac{\sin(x*y)}{x} \)
   c. Press or Enter
   d. Click on the toolbar to graph \( z_2 \)
   e. Open the menu
   f. Select Rotating \( \blacktriangleright \) then Left→Right
   *Click ESC to stop early
   g. Select Zoom/View-Init to return to initial view

Click in the graph window and drag to rotate your graph!
PART III
Practice Exercises

1. Click to open the Main Launcher and then click (3D Graph).

2. Click in the window with z1, z2, etc., and clear its equations [Edit / Clear All].

3. Graph z1=\sin(x*y)/x.

4. Rotate the graph by clicking directly in the graph window and dragging. Continue this until you like your graph.

5. Add the title PART III to your Lesson1 document just below the three screen captures for PART II.

6. Get a screen capture and paste it into your Lesson1 document (under a title of PART III).

   [Remember: To get a screen capture, right click on the ClassPad Manager and select Capture Screen. OR, just press the F8 key.]

7. Open the Zoom menu and select View-y.

8. Get a screen capture. Add two blank spaces following the last screen capture and then paste this one.

9. Experiment with other items in the Zoom menu and also rotating the graph.

10. Get a screen capture. Add two blank spaces following the last screen capture and then paste this one.

PART IV

Written Exercises
Copy and paste the following questions into your Lesson1 document. Answer each question using a complete sentence or sentences.
1. How do you clear a window?
2. How do we select an expression?
3. What does “ans” do?
4. What is an emulator?

Reflection Exercises
You have just completed the first lesson in ClassPad 101, congratulations! Please take a few moments to copy and paste the following three questions at the end of your Lesson1 document and answer them.
1. Approximately how long did it take you to complete this lesson?
2. Which activity did you enjoy the most? Why?
3. Which part of this activity did you find difficult to follow? How did you overcome the difficulty?

Assessment 1: Introduction to the ClassPad Manager Software

• Checkpoint: Your word processed document, titled "Lesson1", should contain the following activities:
  1. Three screen captures from PART I.
  2. Three screen captures from PART II.
  3. Three screen captures from PART III.
  4. Four questions with answers and three reflection questions with answers from PART IV.

• Submit your Lesson1 document to your instructor for grading. Once your lesson is submitted, your lesson for ClassPad 101 “Introduction to the ClassPad Manager” is complete.
