

2010

Casio fx-82AU PLUS “TOP Schools”

T(echnology)O(pportunities)P(roject)

Dear Head of Mathematics,

The Casio Education Division is developing a network of schools across Australia, who will be fx-82 AU ‘TOP Schools’. Schools that have sampled the new Casio fx-82 AU Plus and have decided they would like to implement it with their students are being invited to be part of the group.

The offer:

We recognise that to be a ‘TOP School’ and implement a new-generation Scientific Calculator, ongoing support is required. Our focus at Casio Education is school technology support; therefore we offer the following:

- Your Maths faculty directly will receive three units of fx-82AU PLUS (free).
- Each TOP School will receive a single copy of the PC Emulator Software for their faculty.
- Each TOP School will receive ongoing support via the Casio Education Division (lesson ideas, e-mail support, resources, posters etc.)
- FREE access to Learning Materials produced by Casio Education for the Casio fx-82AU PLUS and updates on the latest resource information.

Conditions of Participation:

TOP Schools have the intention to use Casio fx-82AU PLUS with students at some level from 2010 onwards, with the intention to make fx-82AU PLUS the booklisted Scientific Calculator in their school.

P.T.O

Aims/Outcomes for TOP schools:

It would be desirable that TOP Schools share ideas and information and are able to assist one another in the implementation of the fx-82AU PLUS in their area - eg. Shared e-mail addresses, lesson ideas, resources etc.

The objective of the TOP Schools project is to remove some of the impediments that schools encounter when changing to the latest-generation Scientific technology.

To confirm your participation:

- Please complete a copy of the TOP Schools certificate (– see separate document). Please return one copy to the Casio Education division and retain one copy for your records.
- Please complete the ‘TOP Schools Equipment’ request form and fax this back to us.

Regards,
Casioed.
