Attn: Head of Mathematics

FREE ClassPad Workshops – Term 3, 2009
Presented by Kevin McMenamin

ClassPad Workshops are being held around Tasmania from 28th to 30th of September.
The workshops will be held on the following:

Year 9 and 10 focus
The session will begin with a brief review of the more commonly used features of the ClassPad. The majority of time will be spent exploring the applications that can be used to enhance the teaching and learning of concepts in these middle years of schooling. Focus will be given to the built in areas of statistics, algebra, graphs and geometry and to the add-in application of Algy2.

Year 11 and 12 focus
The session will concentrate on the examinable areas of the Mathematics Applied, Mathematical Methods and Mathematics Specialised courses. Questions will focus on the areas of study involving data analysis, probability distributions, financial calculations, graph analysis, calculus and more. Some time will also be spent discussing the uses of the ClassPad in answering questions of this type and whether it is appropriate and worthwhile.

Enrolment Form
